Availability: Aug. 2026 - Jul. 2027
San Francisco Bay Area

EXPERIENCE

ByteDance (BytePlus Platform Engineering) | *Go, TypeScript, Next.js, SEO* Jan. 2026 - Present
Software Engineering Intern *Singapore*

- Engineered **critical features** for byteplus.com supporting **Seedance 2.0 launch** with load-balanced API gateways & Contact Sales form integrated with BFF layer, directly impacting lead pipeline for **1000+ B2B clients**.
- Re-architected BytePlus.com site data from hardcoded TSX to **config-driven i18n system** with dynamic routing, reducing deployment friction for PMs & cutting iteration cycles from **days → minutes**.
- Built **Golang-based health monitoring service** with alerting pipelines to track lead generation metrics & conversion funnel performance, enabling **real-time incident response** during peak traffic events.

IBM (Client Engineering) | *Spring Boot, Node.js, AWS, SQL Server, CrowdStrike, React* Sep. 2025 - Dec. 2025
Full Stack Developer Intern *Singapore*

- Forward deployed** on-site to co-engineer **B2G** military personnel **RBAC** system with 65k+ DAU.
- Built **Lambda**-automated event & visitor retry management **batch pipeline** using **Node.js** workers, integrating **FALCON** & **Sequelize** for clearance, triggering notifications using AWS SNS/SES/SQS.
- Implemented **end-to-end** conditional & automated on/offboarding with **real-time cross-system validation** to handle user **role management** across multiple locations, reducing manual data entry by **80%**.

CloudJoi (Malaysia's #1 arts ticketing platform) | *Laravel, React Native, Next.js* May. 2025 - Aug. 2025
Software Engineering Intern - cloudjoi.com *Kuala Lumpur, Malaysia*

- Shipped **20+** features & hotfixes under C-Suite supervision for B2C platform, B2B dashboard, & mobile app.
- Contributed towards **AI semantic search & recommendations** via **vector embedding** & clustering metadata.
- Launched knowledgebase.cloudjoi.com—dashboard helpdesk for **200+ clients**—**0→1** on **Next.js** with RESTful API.
- Deployed **ticket check-in/out system** for all live CloudJoi shows, enabling organisers to manage attendee status.
- Integrated **password change confirmation** flow with **queue-based email notifications** & Redis caching.

Strive (YC S21) | *Python, p5* Jan. 2024 - Jun. 2024
Software Engineering Intern *Singapore*

- Released **25+** suites of interactive **p5.js** & **Python** games explaining math concepts, used by **over 10K** students.

ENTREPRENEURSHIP & PROJECTS

DrawMyRoute (AI Running Route Generator) | *RAG, Next.js, FastAPI, OSRM, Mapbox* Jan. 2026 - Present

- Built an AI route generator for Hack&Roll 2026 that transforms text prompts into GPS-snapped running routes.
- Engineered 5-stage RAG pipeline with vector search & LLM re-ranking to match prompts to 500+ SVG library.
- Implemented multi-variant parallel optimiser testing 16 rotation/scale combinations for optimal road snapping.
- Leveraged OSRM's Dijkstra-based shortest path routing to snap abstract shapes onto real-world road networks.
- Developed FreeType vector font rendering to convert literal text (e.g., "NUS") into runnable GPS coordinates.

Box-Play (Floorball AI Search) | *Python, PyTorch, CLIP, FAISS, Streamlit, OpenCV* Dec. 2025 - Present

- Currently in **early R&D phase**, architecting a **multimodal semantic search engine** for floorball match recordings, while pursuing partnerships with the **Singapore Floorball Association** for pilot implementation.

Grid Universe AI Agent | *PyTorch, NumPy, Scikit-learn* Oct. 2025 - Nov. 2025

- Engineered an autonomous agent for a stochastic grid-world, across 48 complex test levels.
- Designed a custom CNN architecture (PyTorch) to reconstruct game state from snapshots with **99% accuracy**.
- Developed a lightweight statistical cipher decoder using SVD and NumPy to interpret encrypted objectives.

EDUCATION

National University of Singapore | Bachelor of Computing in **Computer Science** Dec 2027

NUS Scholar | Residential College Entrepreneurship Club **President** | Notion **Campus Leader** | **Teaching Assistant**

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, PHP, JavaScript, Swift, C, C++, SQL, HTML, CSS, R, Assembly, Bash

Frameworks: React (Native), Node.js, Next.js, Laravel, Spring Boot, Supabase, Flask, Django, FastAPI

DevOps & Tools: AWS, SQL Server, MySQL, MongoDB, PostgreSQL, Git, Vim, Xcode, GCP, Docker, IntelliJ, CLI

Libraries: Matplotlib, NumPy, pandas, Pygame, Cocos, PIM, p5.js, SwiftUI, Inertia, Three.js, sklearn, PyTorch
