Availability: Aug. 2026 - Jul. 2027
San Francisco, California

WORK AUTHORISATION

Singapore Citizen, eligible for university-sponsored 12-month J-1 US visa; no company sponsorship required.
EDUCATION

National University of Singapore | Bachelor of Computing in **Computer Science** Dec 2027
Stanford MSE & NOC Silicon Valley '26/27 | **NOC Malaysia '25** | UTown Residential College **Scholarship**
RC4 Entrepreneurship Club President | **Notion Campus Leader** | **2x NUS SoC Teaching Assistant**

EXPERIENCE

ByteDance (BytePlus) | Software Engineering Intern Jan. 2026 - Present
BytePlus builds & provides ByteDance's AI & cloud technologies to enterprises - byteplus.com *Singapore*
• **GrowthOps platform & PRM system.**

IBM (Client Engineering) | Full-Stack Developer Intern Sep. 2025 - Dec. 2025
IBM Client Engineering rapidly prototypes and deploys solutions for B2G & B2B clients. *Singapore*
• **Forward deployed** on-site to co-engineer **B2G** military personnel **RBAC** system using **React, Spring Boot/Node.js, AWS, & SQL Server** with **CrowdStrike** endpoint protection.
• Built **Lambda**-automated event & visitor retry management **batch pipeline** using **Node.js** workers, integrating **FALCON & Sequelize** for clearance, triggering notifications using SNS/SES/SQS & monitoring via CloudWatch.
• Implemented **end-to-end** conditional & automated on/offboarding with **real-time cross-system validation** to handle user **role management** across multiple locations, reducing manual data entry by **80%**.

CloudJoi | Software Engineering Intern May. 2025 - Aug. 2025
CloudJoi is Malaysia's largest digital ticketing platform for the arts - cloudjoi.com *Kuala Lumpur, Malaysia*
• Shipped **20+** features & hotfixes for **React/Laravel** B2C platform, B2B dashboard, & **React Native** mobile app.
• Contributed to TypeSense **semantic search & recommendations** via **vector embedding** & clustering metadata.
• Launched knowledgebase.cloudjoi.com—dashboard helpdesk for **200+ clients**—**0→1** on **Next.js**.
• Deployed **ticket check-in/out system** for all live CloudJoi shows, enabling organisers to manage attendee status.
• Integrated **password change confirmation** flow with **Laravel-automated email notifications** & Blade designs.

Strive (YC S21) | Software Engineering Intern Jan. 2024 - Jun. 2024
Strive teaches coding in Python to youths, YC S21-backed & Forbes 30 Under 30 Asia *Singapore*
• Released **25+** suites of interactive **p5.js & Python** games explaining math concepts, used by **over 10K** students.

ENTREPRENEURSHIP & PROJECTS

Grid Universe AI Agent | *Python, PyTorch, NumPy, Scikit-learn* Oct. 2025 - Nov. 2025
• Engineered an autonomous agent for a stochastic grid-world, across 48 complex test levels.
• Designed a custom CNN architecture (PyTorch) to reconstruct game state from raw pixels with **99% accuracy**.
• Developed a lightweight statistical cipher decoder using SVD and NumPy to interpret encrypted objectives.
• Optimized A* search with Manhattan heuristics to handle dynamic hazards, achieving **100% success** in path finding.

Lokode (iOS Focus & QRCode Lock App) - TestFlight | *SwiftUI, Supabase, Next.js* Jul. 2025 - Present
• Founded the 1st Swift QR-based locking app to maximise user focus—delivered 100% free unlike paid alternatives.
• Devised Google OAuth authentication via Supabase, user profiles, & emergency unlock for user management.
• Implemented advanced QR code generation/scanning for instant device lock/unlock via CoreImage & ScreenTime.
• Developed interactive analytics dashboards with real-time charts for focus duration & productivity metrics.

AI 2048 Solver | *Python, React, FastAPI* Jan. 2025 - Mar. 2025
• Initiated a 2048 game solver, applying sophisticated heuristics with mini-max algorithm & alpha-beta pruning.
• Applied sophisticated heuristics including positional weighting, clustering penalties, & empty cells.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, PHP, JavaScript, Swift, C, C++, SQL, HTML, CSS, R, Assembly, Bash
Frameworks: React (Native), Node.js, Next.js, Laravel, Spring Boot, Supabase, Flask, Django, FastAPI
DevOps & Tools: AWS, SQL Server, MySQL, MongoDB, PostgreSQL, Git, Vim, Xcode, GCP, Docker, IntelliJ, CLI
Libraries: Matplotlib, NumPy, pandas, Pygame, Cocos, PIM, p5.js, SwiftUI, Inertia, Three.js, sklearn, PyTorch
